Office Action Summary

Application No.

10/789,212

Applicant(s)

FLYNN ET AL.

Examiner

Robert A. Hopkins

Art Unit

1724

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-11 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 1-4 is/are allowed.
- 6) ☒ Claim(s) 5,6 and 9-11 is/are rejected.
- 7) ☒ Claim(s) 7 and 8 is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. ____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 112

Claim 10 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 10 recites "wherein the discharge underflow comprises a majority portion of liquid and a minority portion of gas". Claim 7 teaches a chlorine/titanium dioxide mixture, therefore claim 10 lacks antecedent basis because claim 7 does not include a liquid in the mixture. Correction is requested.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 5,6,9 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Schwamborn(5188237).

Schwamborn teaches a method for separating gas from a first gas/solid mixture comprising introducing the first gas/solid mixture(from inlet 4) into a cyclone(1), separating the first mixture into a gas overflow(19) and a discharge underflow(7), introducing a purge gas stream(from gas supply system 33) to the discharge underflow to create a second mixture comprising purge gas and gas displaced from the discharge underflow, and merging the second mixture with the gas overflow. Schwamborn further

Art Unit: 1724

teaches wherein the discharge underflow comprises a majority portion of solids and a minority portion of gas.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Schwamborn(5188237).

Schwamborn teaches all of the limitations of claim 11 but is silent as to wherein the purge gas is nitrogen or carbon dioxide. Examiner respectfully submits that nitrogen and carbon dioxide are well known gases for use in purge gas systems, therefore it would have been obvious to someone of ordinary skill in the art at the time of the invention to provide a purge gas is nitrogen or carbon dioxide to the gas supply system 33 to effectively create a second mixture and merge the second mixture with the gas overflow.

Allowable Subject Matter

Claims 7,8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 7 recites "wherein the gas is chlorine and the solid is titanium dioxide". Schwamborn teaches separating a powder from a feed gas. It would not have been

Art Unit: 1724

obvious to someone of ordinary skill in the art at the time of the invention to provide a gas which is chlorine and the solid which is titanium dioxide because Schwamborn does not suggest such a modification.

Claim 8 recites "wherein the first mixture is a gas/liquid mixture". Schwamborn teaches separating a powder from a feed gas. It would not have been obvious to someone of ordinary skill in the art at the time of the invention to provide a first mixture which is a gas/liquid mixture because Schwamborn does not suggest such a modification.

Claims 1-4 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Claim 1 recites "a containment vessel in communication with the gas outlet and in communication with the discharge outlet, and a purge gas stream in communication with the discharge outlet and in communication with the containment vessel".

Schwamborn teaches a single cyclone having a gas outlet and a discharge outlet and a purge gas stream in communication with the discharge outlet, but does not teach a containment vessel in communication with the gas outlet and in communication with the discharge outlet, and a purge gas stream in communication with the discharge outlet and in communication with the containment vessel. It would not have been obvious to someone of ordinary skill in the art at the time of the invention to provide a containment vessel in communication with the gas outlet and in communication with the discharge outlet, and a purge gas stream in communication with the discharge outlet and in

Art Unit: 1724

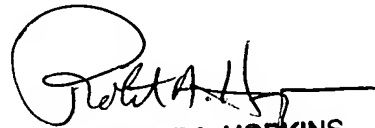

communication with the containment vessel because Schwamborn does not suggest such a modification. Claims 2-4 depend on claim 1 and hence are also allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert A. Hopkins whose telephone number is 571-272-1159. The examiner can normally be reached on Monday-Friday, 7am-4pm, alternate Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Duane Smith can be reached on 571-272-1166. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
